

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the First Plymouth and Bristol Senatorial District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of First Plymouth and Bristol Senatorial District

Characteristics of Admissions

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; 1.8% (2,290) reside in the First Plymouth and Bristol Senatorial District. 1.6% (36) of admissions from the First Plymouth and Bristol Senatorial District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from First Plymouth and Bristol Senatorial District reported the following characteristics:

- 75% were male and 25% were female.
- 63% were between the ages of 21-39.
- 87% were white non-Latino, 4% were black non-Latino, 6% were Latino, and 3% were other racial categories.
- 63% were never married, 17% were married, and 20% reported not to be married now.
- 28% had less than high school education, 53% completed high school, and 19% had more than high school education.
- 34% were employed.
- 7% were homeless.
- 27 had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the First Plymouth and Bristol Senatorial District.

Table 1					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	57%	30%	4%	3%	1%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, including the prevalence of injection drug users (IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used: FY 1995 – FY 2002							
First Plymouth and Bristol Senatorial District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	1,632	1,353	478	494	212	470	298
FY '96	1,674	1,395	542	456	232	453	329
FY '97	1,906	1,557	556	454	261	512	385
FY '98	2,229	1,743	649	517	198	674	465
FY '99	2,211	1,690	717	583	238	766	513
FY '00	2,098	1,561	683	610	241	717	480
FY '01	2,290	1,707	669	598	214	837	558
FY '02	2,290	1,715	689	603	218	832	540

Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the First Plymouth and Bristol Senatorial District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
